Discuss changes in publication feature for the user.	Completed
Discuss working of search and filter functionality	Completed
Filter based on publication date, category, tags.	In progress
Add rating to publication	In progress
Sort results based on rating, views, relevance	In progress

New Business

Discussions Summary: As per our previous discussion, the UI of the overall application was improved. We also discussed the fields required for user publications – the fields a user can add while adding publication in his/her account. As per the previous approach the user can add pdf documents for his/her publication. When any user clicks on the publication link, PDF file of the paper will be displayed. If the author clicks the link, publication will open in edit mode and user can change the fields as required.

We also need to add *Ratings* attribute to the publication where other users can give ratings to publication of other users.

Decisions Summary:

1. Publication-
   - Add Rating and Interest attributes in publication table.
   - Allow tagging another user as co-author.
   - Allow another user to rate the publication.
2. Filter search result based on rating, relevance, publication date.

New Action Items:

Action Item	Assignee
Updating JIRA stories	Jayendra
Learning MEAN stack	All
Improve UI	Shubham/Gulshan
Add changes for publication-frontend	Gulshan/Shubham
Add changes for publication-backend	Jayendra/Gulshan
Search and filter UI	Shubham/Gulshan
Search and filter backend	Jayendra/Xinquan/Gulshan
Dashboard	Gulshan/Jayendra/Shubham
